## Smarter ship management and operations with ShipManager™ and Navigator™

DNV GL is a world-leading provider of maritime software – our offerings for shipping companies cover solutions for smarter technical and commercial ship management and operations.

Our maritime software is used by 300 shipping companies on over 4000 vessels worldwide. We offer unsurpassed investment security and a local presence, with 300 DNV GL offices in more than 100 countries.

Our ShipManager and Navigator solutions cover the maritime industry's needs within technical management, hull integrity management, QHSE, dry docking, procurement and stock control, crewing, port clearance, voyage planning, weather routing and fleet performance monitoring.

### 10 good reasons for choosing ShipManager and Navigator:

- Increase availability of your vessels
- Increase productivity of your key staff
- Increase transparency of operations
- Show stakeholders that your fleet is well managed
- Analyse and optimize ship management and operational cost
- Reduce dry docking times and cost
- Increase compliance to highest standards
- Reduce delays, off-hire and detentions
- Save fuel and operational cost
- Improve your environmental footprint

Being a leading provider is not only a matter of size, it also depends on being at the forefront of innovation, domain knowledge and thought leadership. We offer easy-to-use solutions with high-quality implementation and support services, including proven hosting services. We also have a local presence in key shipping locations with 24/7 global support.

#### Our maritime software solutions:
